Huon Highway and Mountain River Road Intersection

Option D – pedestrian overpass

Design option only - subject to further design, consultation and approvals.

Summary

- Includes an accessible pedestrian overpass over the Huon Highway.
- Includes an area where pedestrians can stop (pedestrian refuge) when crossing Mountain River Road.
- The current bus stop locations remain on the Huon Highway.
- Provides car pick-up and drop-off areas on Mountain River Road and Turn Creek Road.

Pros

- Pedestrians do not need to cross the Huon Highway.
- Bus operations are not impacted.
- Provides car pick-up and drop-off areas on both sides of the highway.
- Bus stops on Huon Highway upgraded to be more accessible.
- Pedestrian refuge on Mountain River Road allows pedestrians to cross one section at a time.

Cons

- It will take approximately 4 minutes to cross the Huon Highway via the overpass ramps.
- There is a risk of pedestrians not using the overpass and still crossing directly over the Huon Highway.
- Significant land acquisition with property impacts to landowners.
- This option has a very high construction cost.
