

Esk Main Road at St Marys Pass

Orange Route – Lower German Town Road Extension

Benefits

- New road is an opportunity to design a more modern road.
- No disruption to travel on existing road during construction.
- Using a section of existing road reduces total area of environmental impact.

Challenges

- Geology is not ideal for roadbuilding, so it will be a complex and challenging engineering project.
- More work to reduce the risk of landslides.
- This route crosses rivers which will require new bridges and may be at risk from floods.
- Higher environmental impact by building a portion of new road through undisturbed forested areas.
